Project ID: #3218-01

Chordec
A Guitarist's Essential Tool

Interested in playing a guitar, but unable to hone your basic chords? Chordec provides the suitable platform for you! Using the Android Smartphone's powerful embedded system to analyze sounds emitted from guitar strums, Chordec objectively detects and displays played chords in real time. Guitar players are therefore able to determine their accuracy of strumming chords, by observing the display, and work on areas like fingering or strumming to produce more accurate playing. Chordec is a guitarist's essential tool.
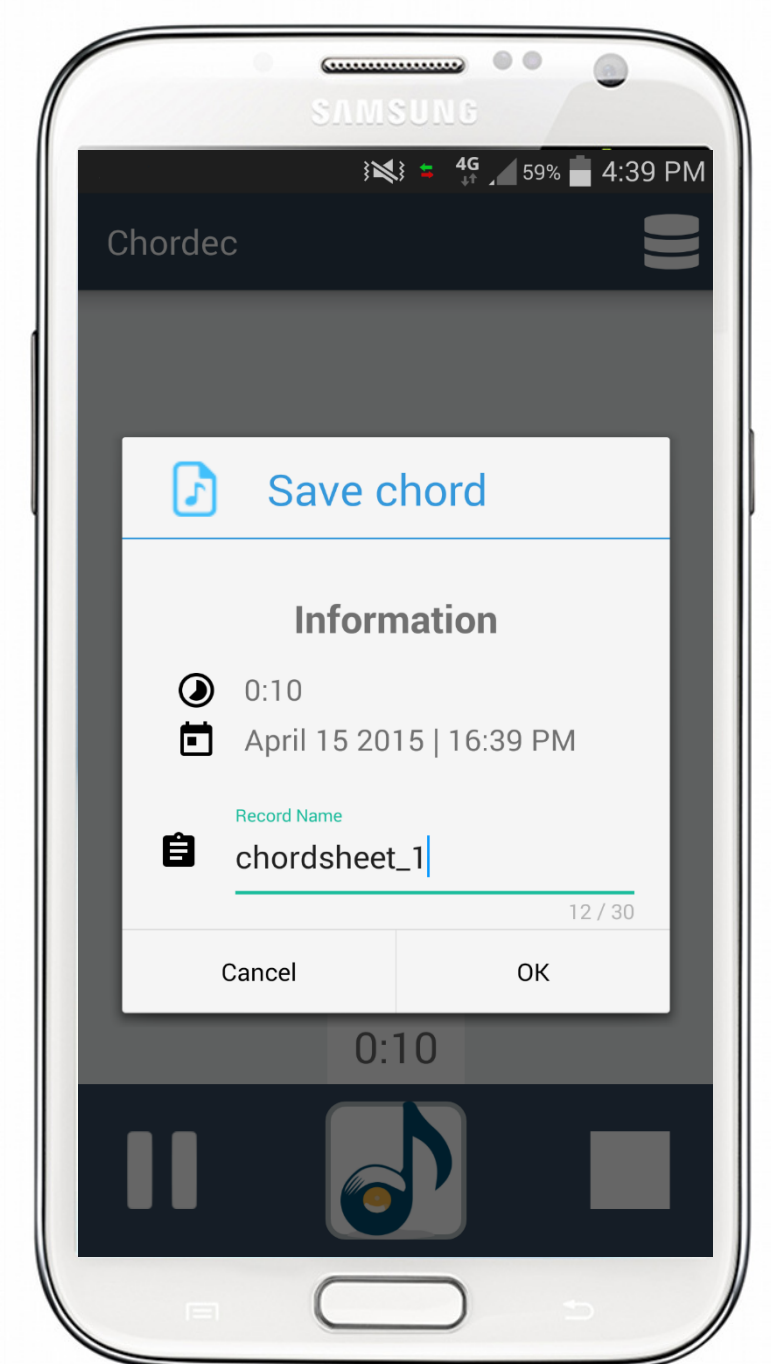

Start detecting chords!

Chordec presents a simple user interface, in line with its simple features. Press the iconic note at the center, and play your guitar to start detecting and recording chords!

Detect chords in real time!

Chordec listens to your guitar tunes in real time through the Android Smartphone's powerful microphone, recording and analyzing it on the go, to display your chords!

Save your played chords!

Chordec allows you to save your recorded chords for reference later, so that you have that special chord progression or simple chordsheet at your fingertips!

A Chord Professional in Every Phone!
